

Target gene expression profile

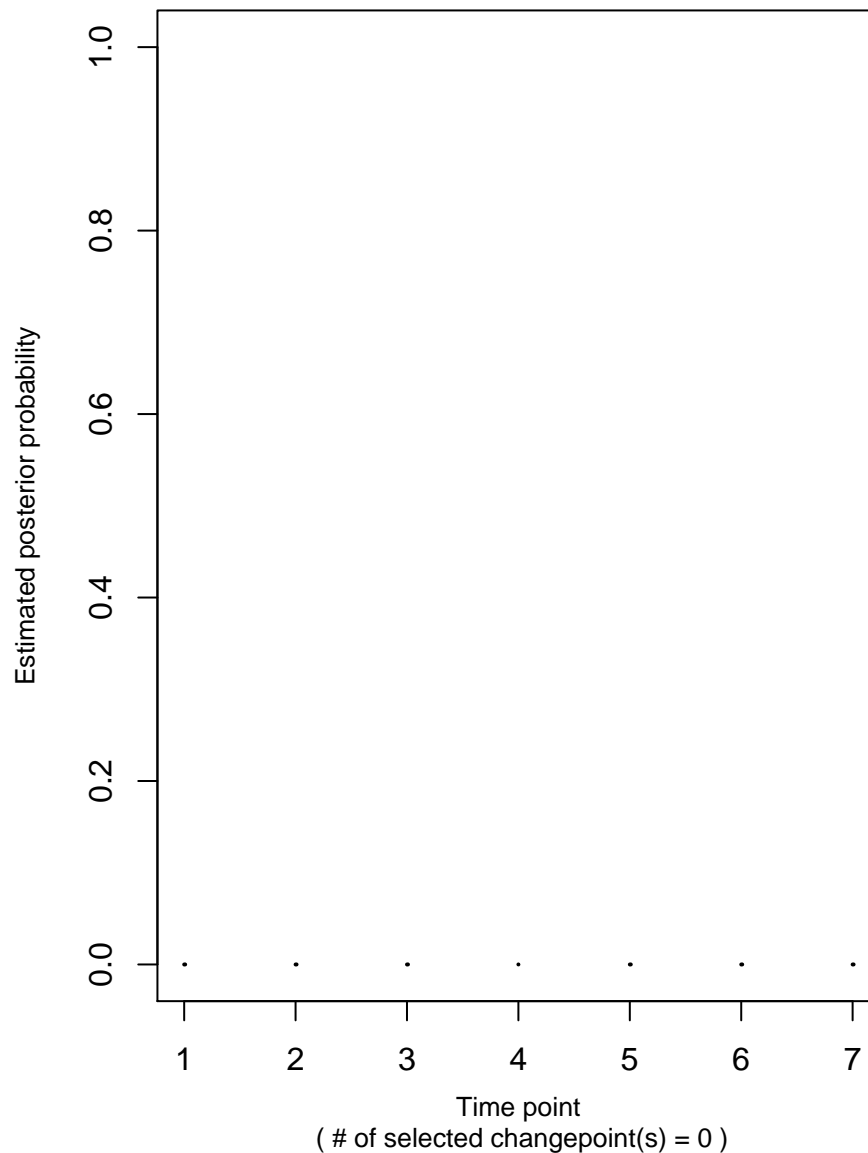

Parent gene expression profiles

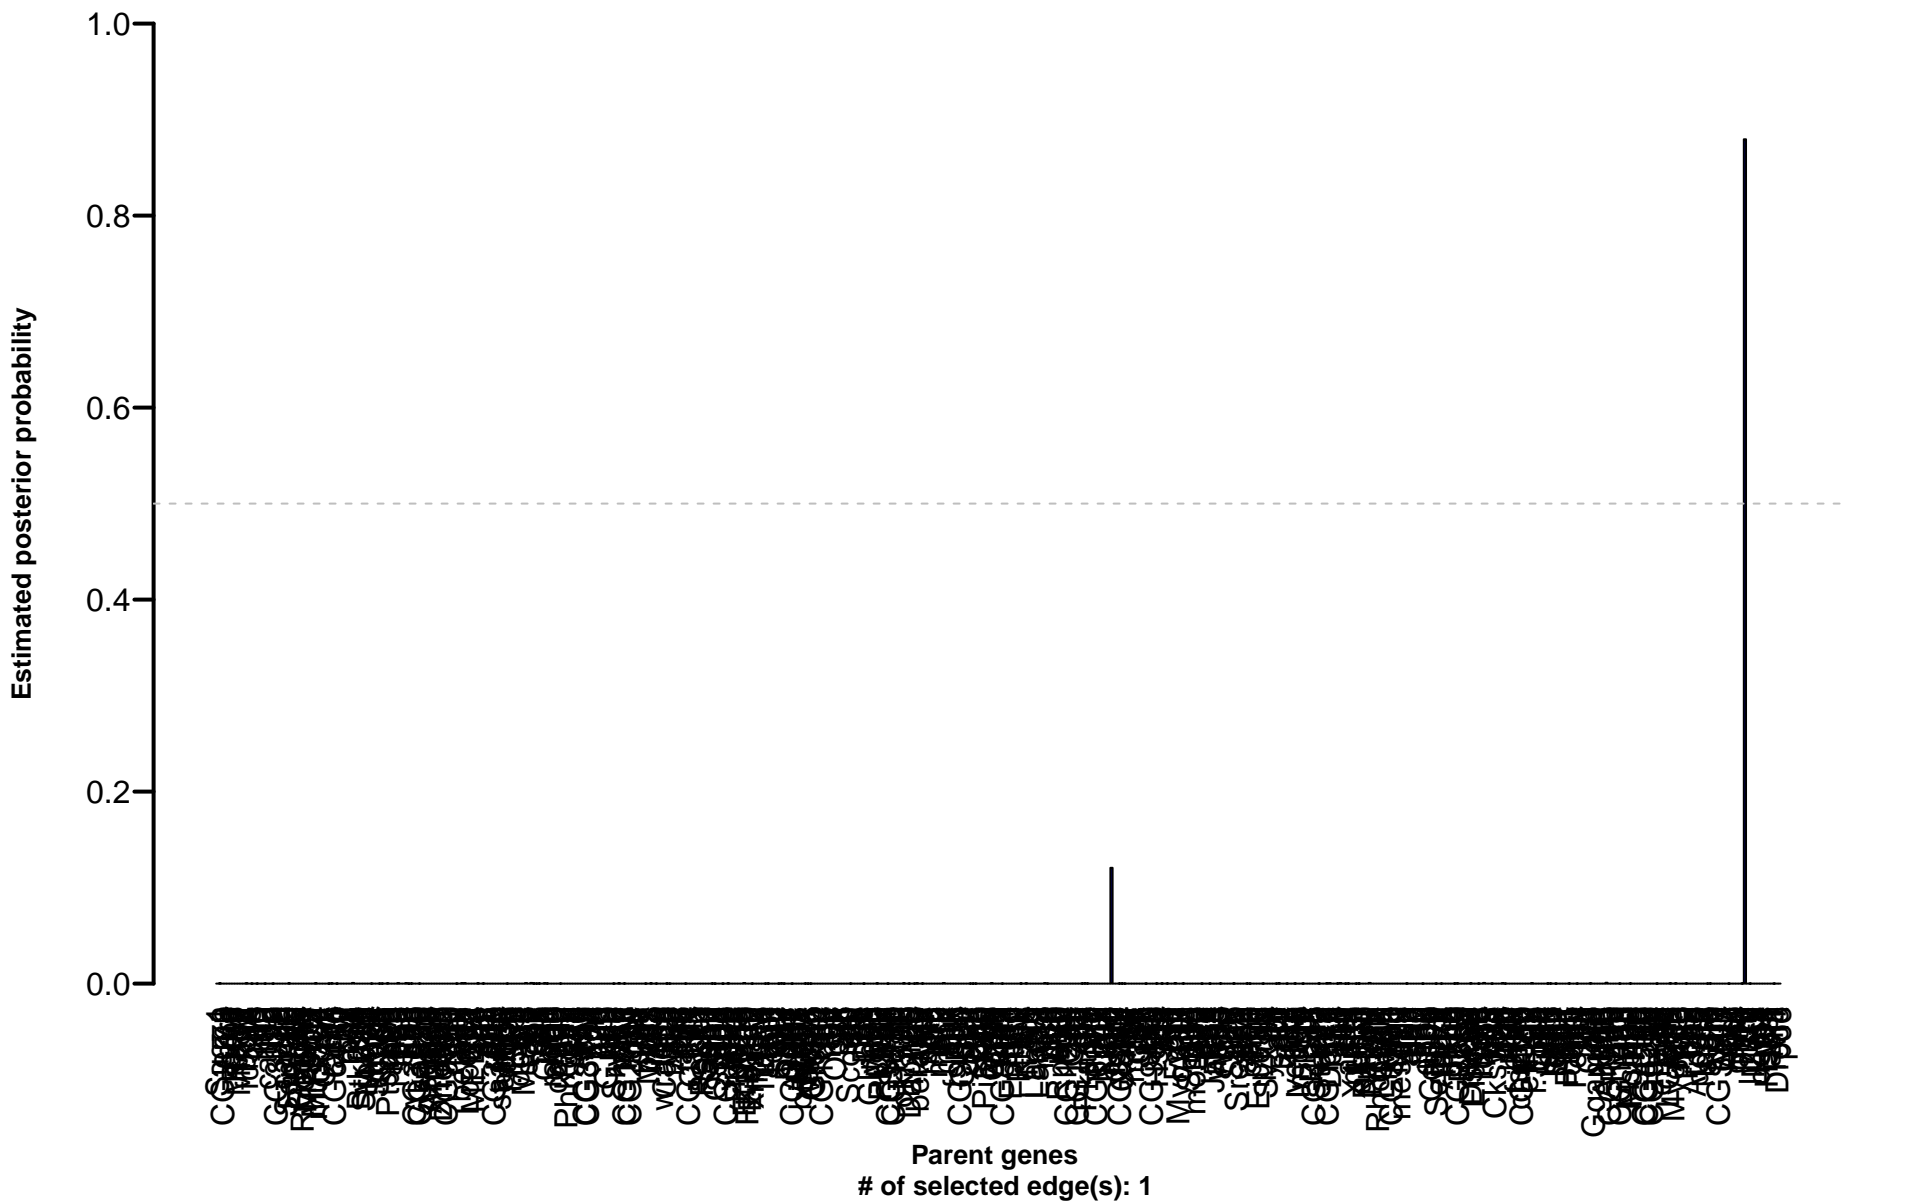

Number of changepoint
– target gene: tll –

Changepoint position
– target gene: tll –

Regulatory model for target gene: *tll*
Temporal segment # 1 : [2 , 6]

— Positive interaction
- - - Negative interaction

ARTIVA summary page
(interactions are arranged in order of decreasing confidence level)

parentGene	targetGene	postProb	CPstart	CPend	interactionSign
