

Target gene expression profile

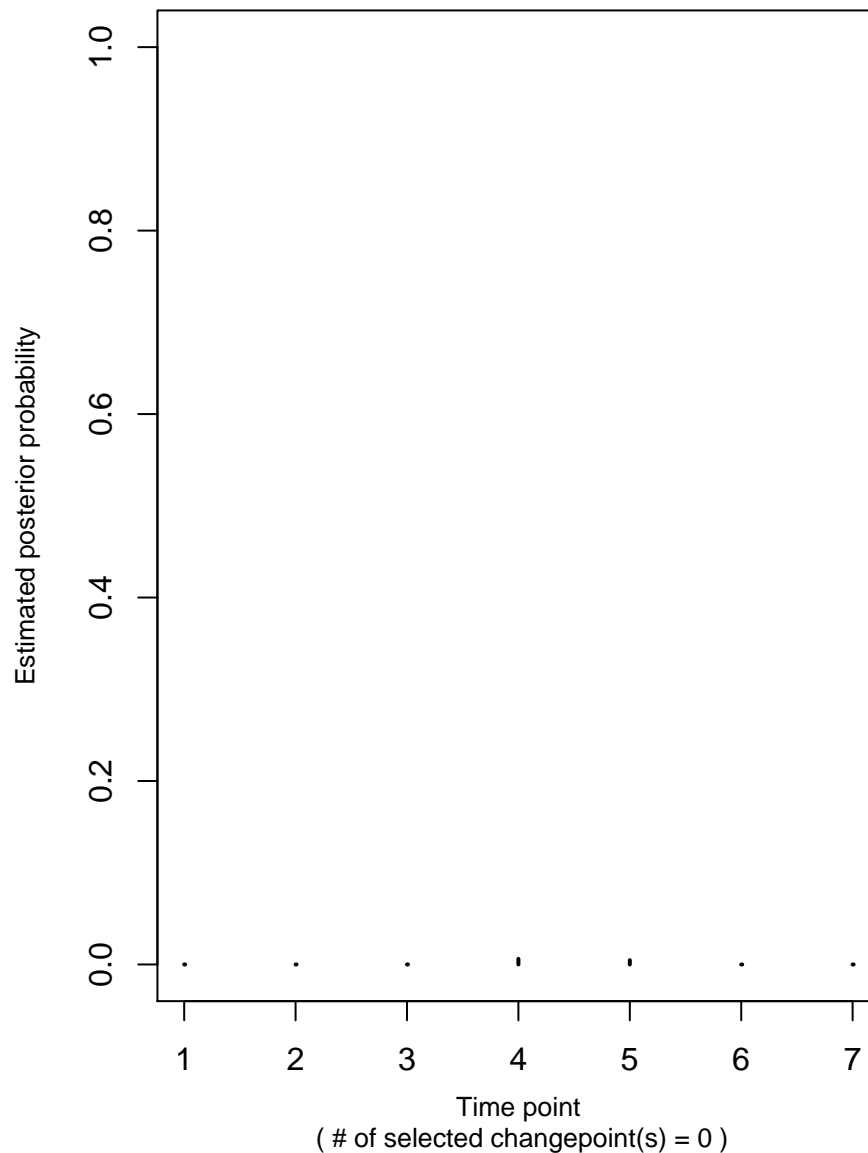

Parent gene expression profiles

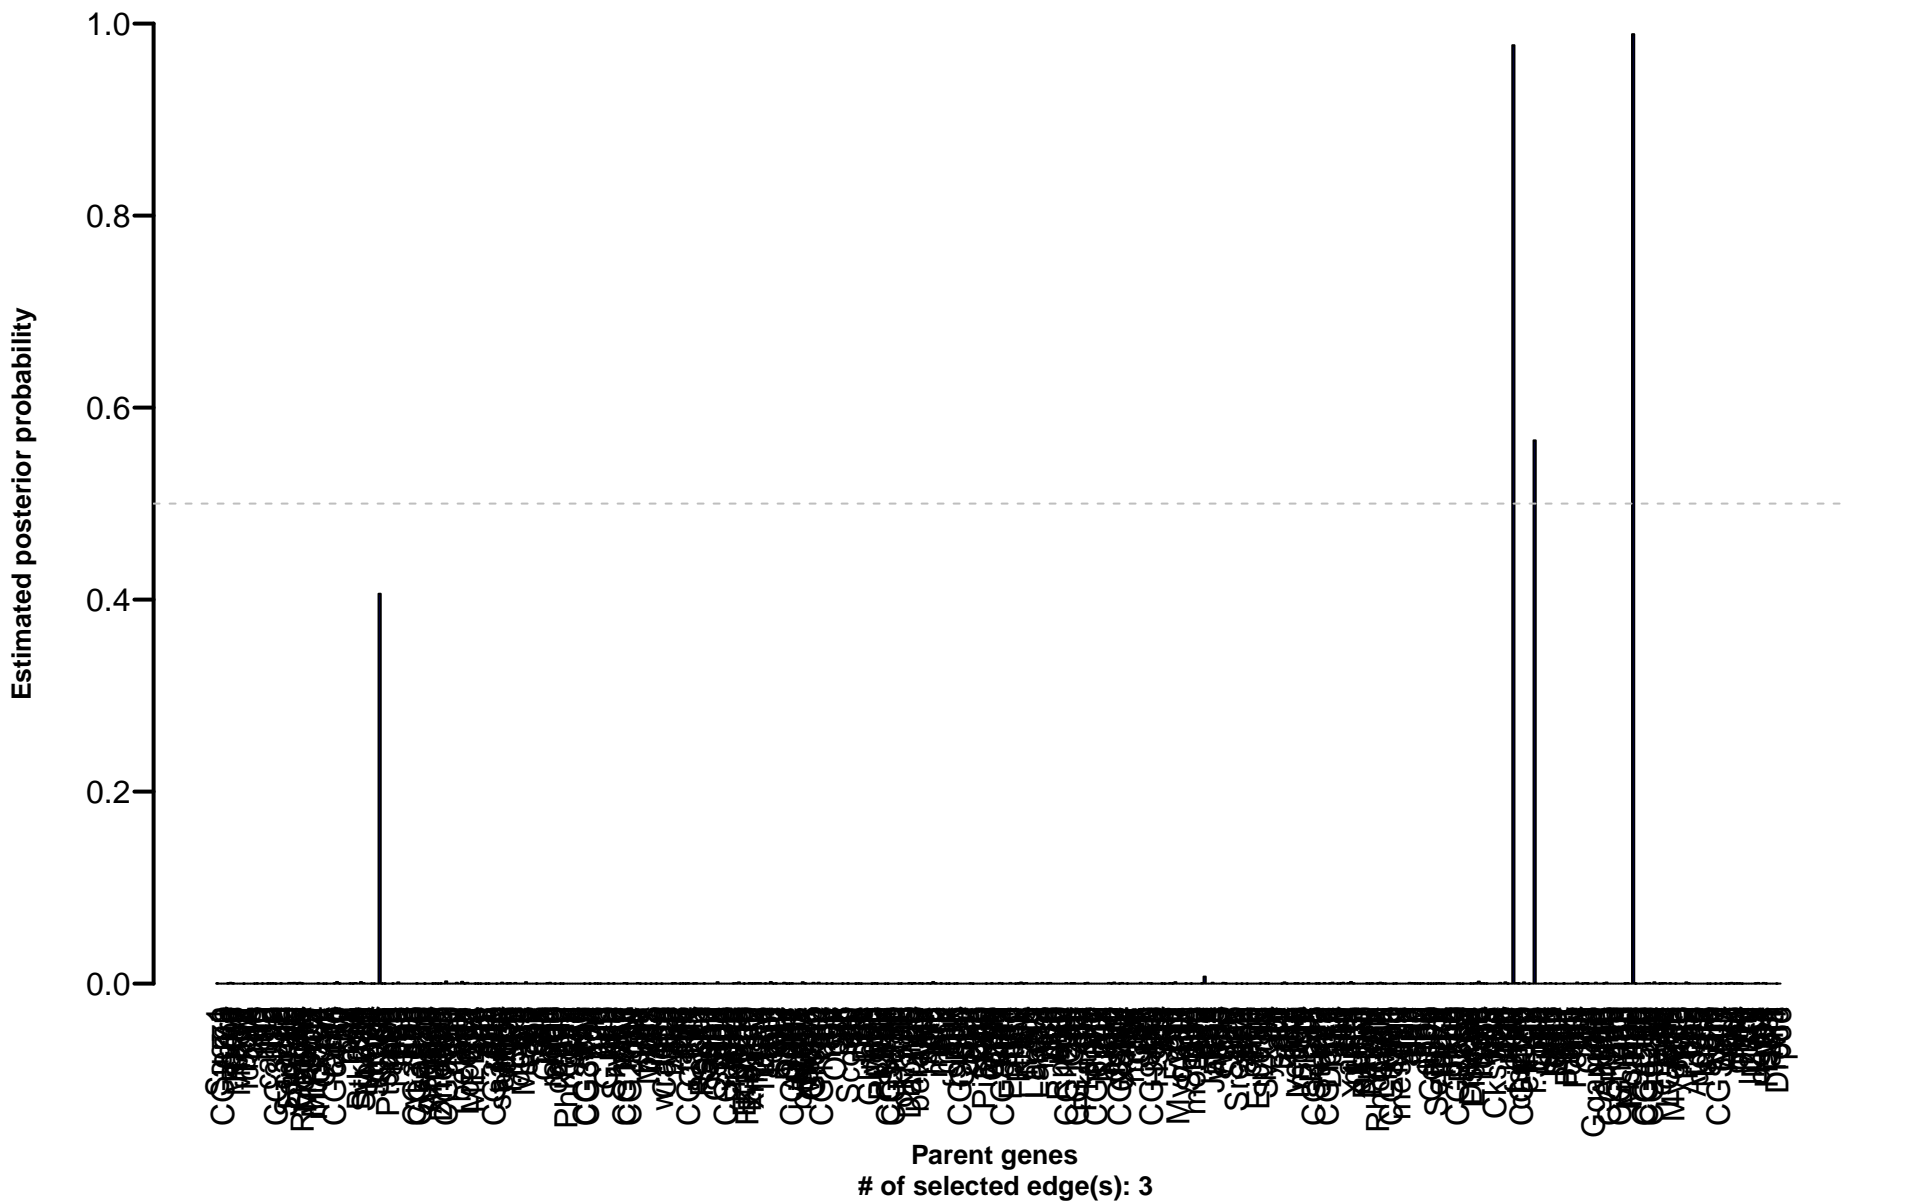

Number of changepoint
– target gene: Jra –

Changepoint position
– target gene: Jra –

Regulatory model for target gene: Jra
Temporal segment # 1 : [2 , 6]

—	Positive interaction
---	Negative interaction

ARTIVA summary page
(interactions are arranged in order of decreasing confidence level)

parentGene	targetGene	postProb	CPstart	CPend	interactionSign
400	1	0.989	2	6	-
269	1	0.9775	2	6	+
312	1	0.5659	2	6	-
