

Target gene expression profile

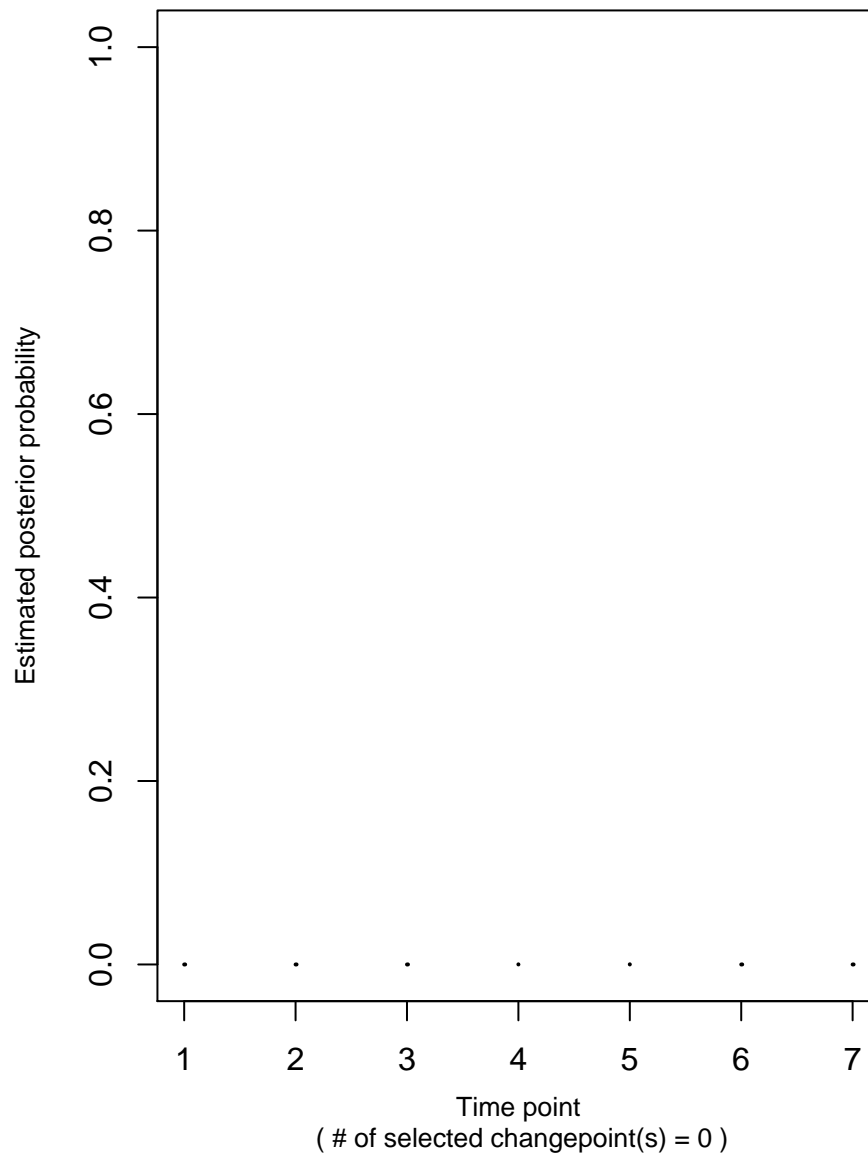

Parent gene expression profiles

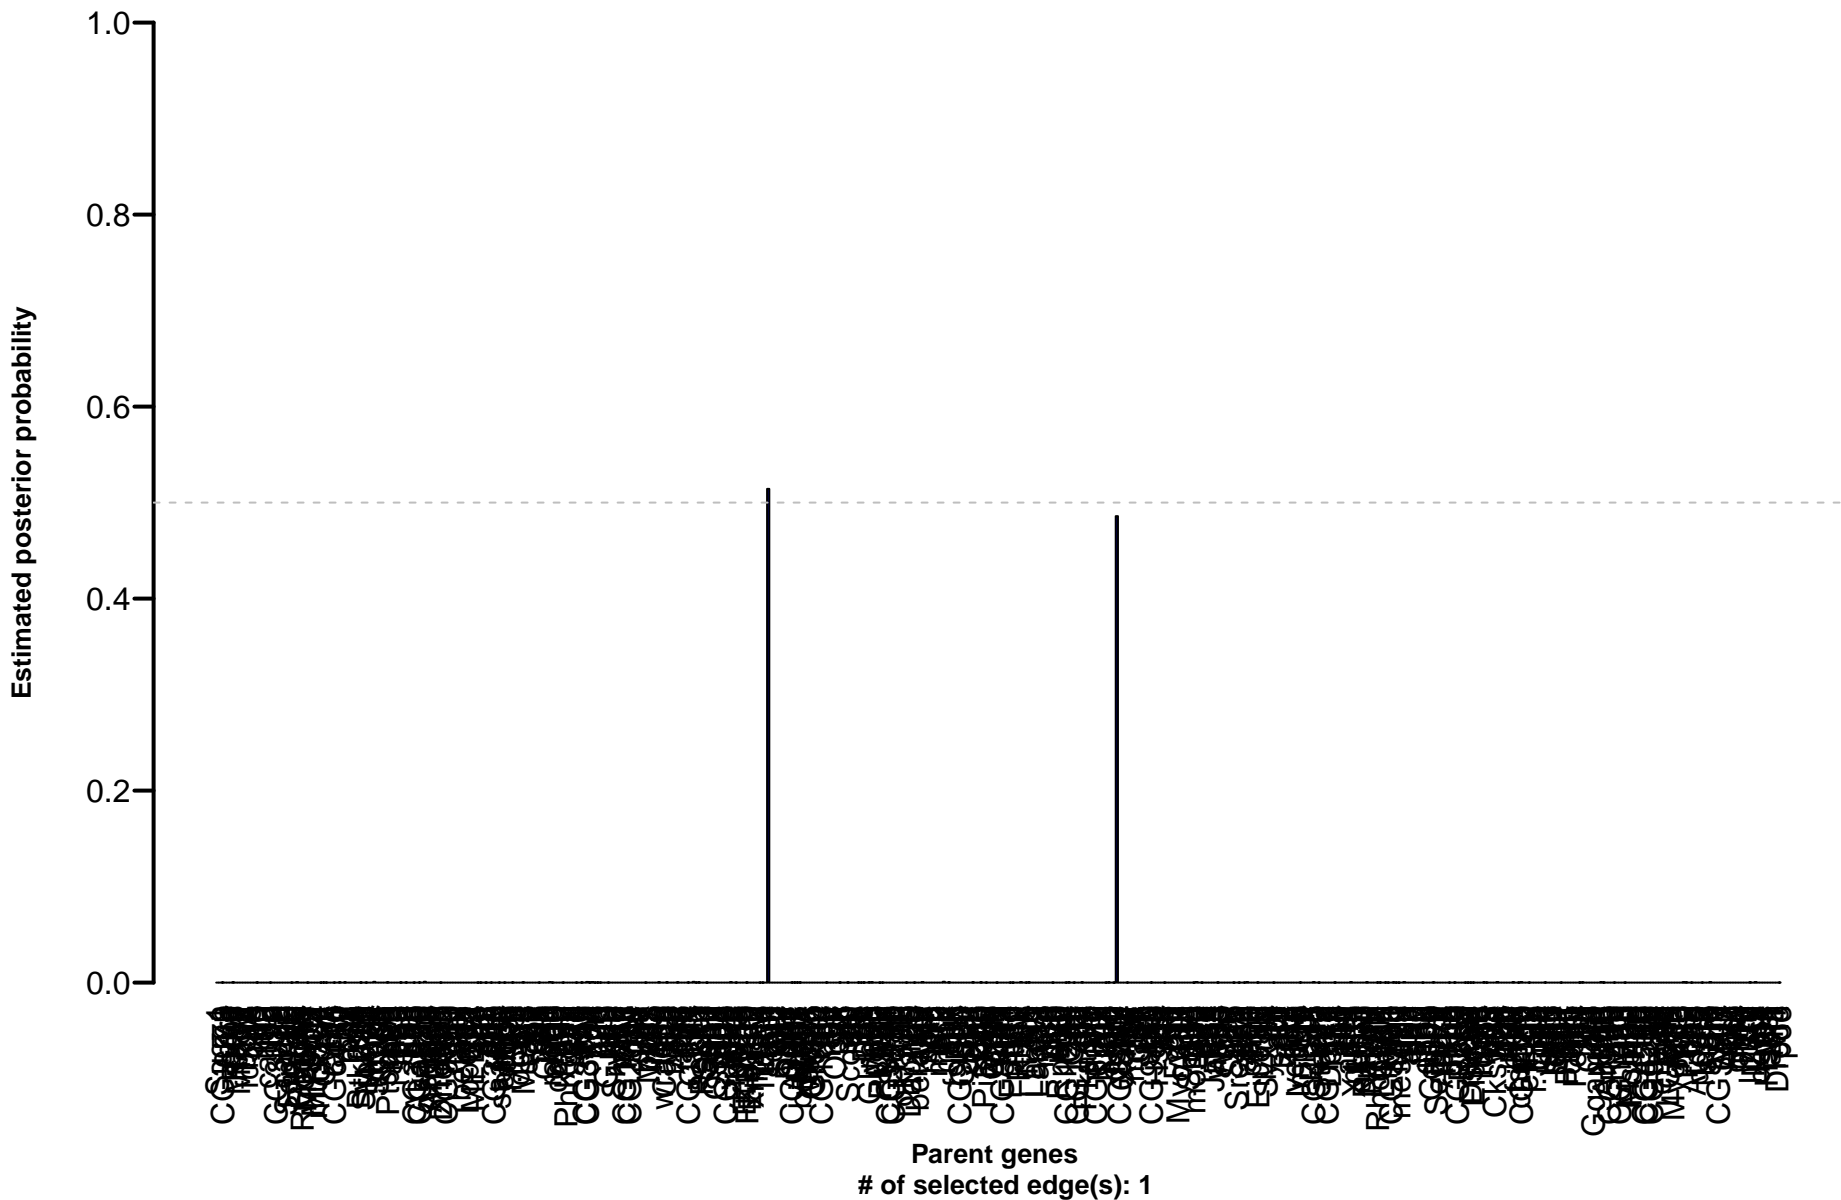

Number of changepoint
– target gene: sqd –

Changepoint position
– target gene: sqd –

Regulatory model for target gene: sqd
Temporal segment # 1 : [2 , 6]

[illegible]

— Positive interaction
- - - Negative interaction

ARTIVA summary page
(interactions are arranged in order of decreasing confidence level)

| parentGene | targetGene | postProb | CPstart | CPend | interactionSign |
|-------------------|-------------------|-----------------|----------------|--------------|------------------------|
| 417 | 1 | 0.5143 | 2 | 6 | – |
