

Target gene expression profile

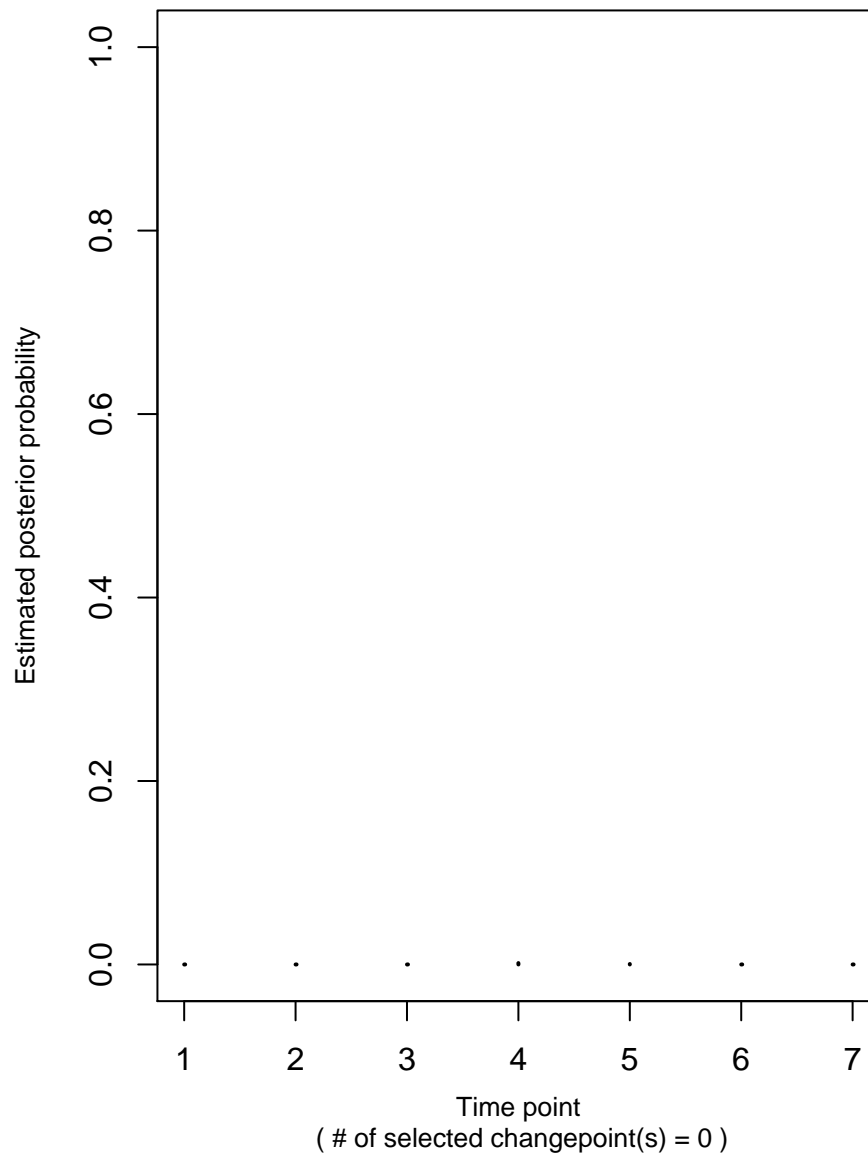

Parent gene expression profiles

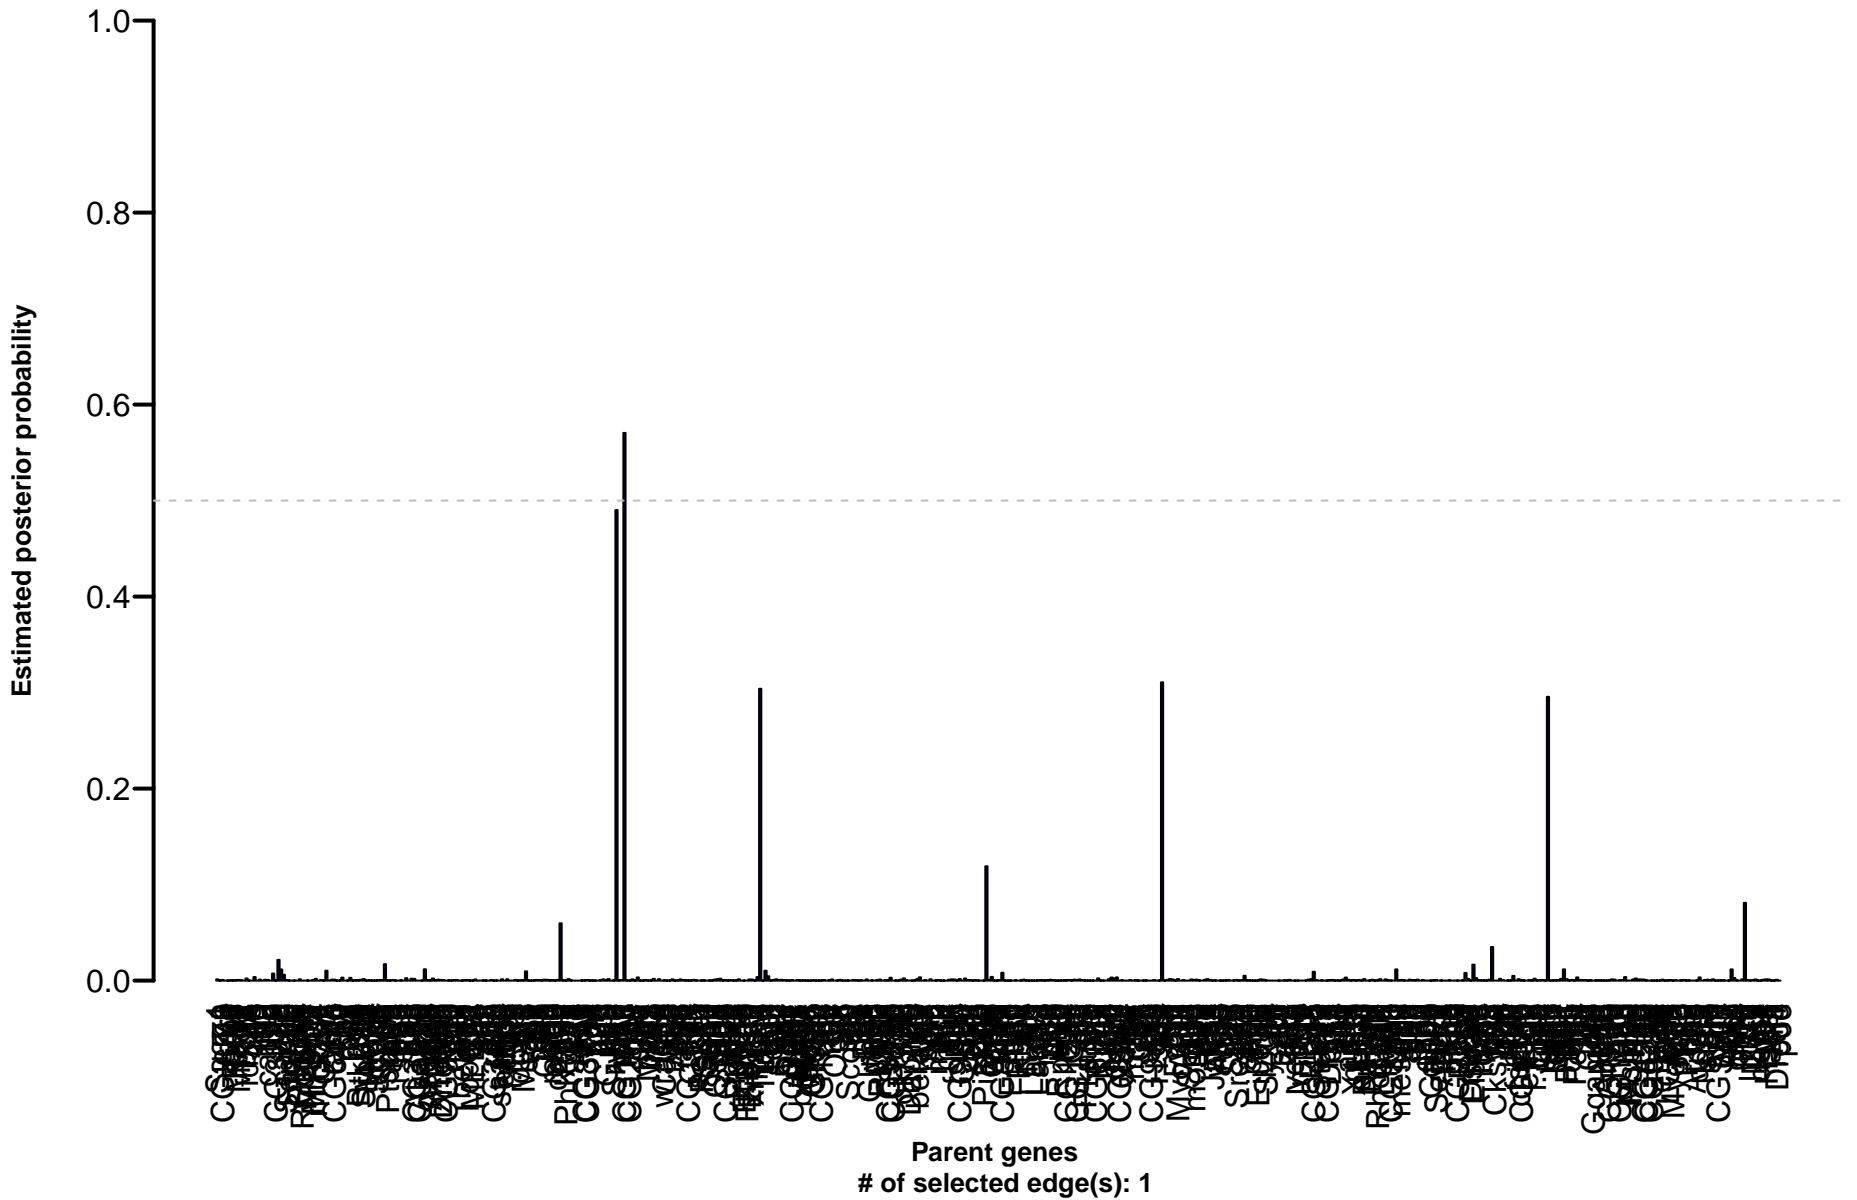

Number of changepoint
– target gene: amx –

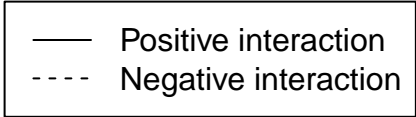

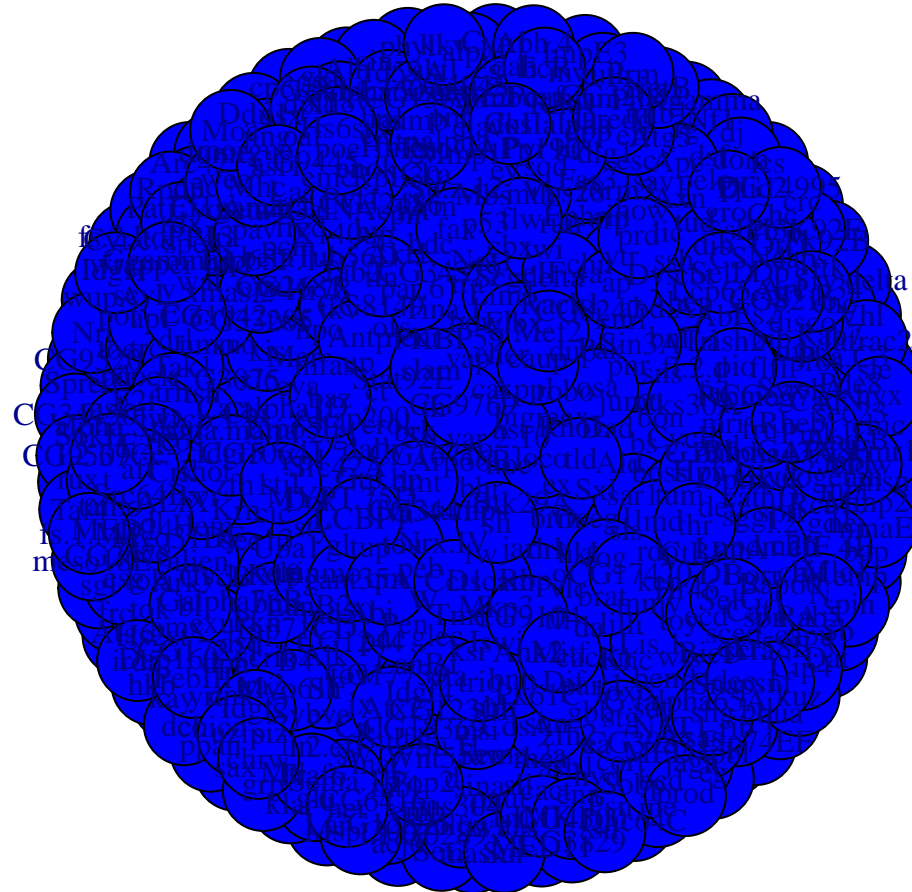

Changepoint position
– target gene: amx –

Regulatory model for target gene: amx
Temporal segment # 1 : [2 , 6]

Sub-network # 1
(time point 2 to 6)

ARTIVA summary page
(interactions are arranged in order of decreasing confidence level)

| parentGene | targetGene | postProb | CPstart | CPend | interactionSign |
|-------------------|-------------------|-----------------|----------------|--------------|------------------------|
| 92 | 1 | 0.5705 | 2 | 6 | + |
