

The graph displays the proportion of the population in the 'Exposed' compartment over 30 time points. The y-axis represents the proportion, ranging from 1.0 to 1.8. The x-axis represents the time point, ranging from 0 to 30. The graph shows a series of peaks and troughs, indicating periodic exposure events. The peaks occur at approximately time points 1, 9, 16, 21, 28, and 30, reaching a value of about 1.9. The troughs occur at approximately time points 7, 11, 17, 22, and 29, reaching a value of about 1.0.

Number of changepoint
– target gene: DI –

Changepoint position
– target gene: DI –

Regulatory model for target gene: DI
Temporal segment # 1 : [2 , 6]

Sub-network # 1
(time point 2 to 6)

— Positive interaction
- - - Negative interaction

ARTIVA summary page
(interactions are arranged in order of decreasing confidence level)
